Samantha

Samantha is a 28-year-old young professional living in downtown Toronto. She is goal-oriented, organized, and ambitious, with a strong desire to establish herself financially and build a future in the city. Samantha enjoys networking with other professionals, participating in community volunteer projects, and exploring new restaurants. She is single, but she is considering purchasing a condo and eventually starting a family. Samantha is also passionate about philanthropy and frequently donates to causes related to education and women's rights.

Samantha works as a marketing manager at a mid-sized tech company. She has a background in digital marketing and data analysis, allowing her to make informed decisions and track the performance of her campaigns. She has been steadily advancing in her career and is interested in developing leadership skills to climb the corporate ladder. Samantha has excellent financial literacy, often researching investment opportunities and ways to grow her wealth.

Samantha is tech-savvy and embraces digital tools to streamline her life. She frequently uses apps for budgeting, investment, and productivity. She is comfortable with adopting new technology and stays updated with financial apps that offer innovative solutions to improve her financial health.

Samantha's primary goals when using the banking application are to efficiently manage her personal finances, set up automatic savings for a future condo, and explore early investment opportunities. She is also looking for ways to integrate philanthropy into her financial life, such as easy options for charitable donations. The system needs to offer her tools for monitoring her progress toward saving goals, investment insights, and automation of day-to-day financial tasks.

John

John is a 42-year-old small business owner who runs a successful consulting firm. He is married with two children and frequently travels across North America and Europe for work. John is pragmatic, detail-oriented, and a problem-solver by nature. He balances the demands of his business with his responsibilities as a father and enjoys spending time outdoors with his family. John values convenience and efficiency in both his personal and professional life.

John has been running his consulting firm for 15 years, with expertise in business operations and supply chain management. His firm deals with international clients, which requires him to manage multiple currencies and global transactions. He is financially adept and capable of handling complex financial matters, both in his business and personal life. John uses accounting software to manage his business's finances and is experienced in using digital banking for day-to-day operations.

John is very comfortable with technology and is constantly on the lookout for tools that can streamline his workflow. He regularly uses cloud-based software to manage his team and clients remotely. For banking, he needs an app that supports his mobile lifestyle, offering multi-currency account management, real-time updates, and seamless international transactions. He values secure and efficient financial solutions.

John's goals include managing multi-currency accounts for his business, handling frequent international transactions, and simplifying his financial management while traveling. He needs real-time insights into exchange rates, the ability to manage both personal and business finances from one platform, and seamless integration with other tools he uses for accounting and expense tracking. Additionally, he wants easy access to customer support in case of any issues while he is abroad.

Emily

Emily is a 21-year-old university student studying psychology at York University. She is outgoing, social, and enjoys spending time with her friends and roommates. Emily is managing her finances independently for the first time, learning to balance tuition fees, rent, and daily expenses. She is enthusiastic about learning and values financial independence. Emily also works part-time at a coffee shop to support herself and pay for her school-related costs.

Emily is still in the early stages of her professional journey, with limited experience in financial management. However, she is learning to budget and build credit by using student-friendly banking products. Emily's part-time job gives her insight into managing income, but she often struggles with keeping track of subscription services (e.g., Netflix, Spotify) and splitting bills with her roommates. She is focused on maintaining a good credit score for the future, as she knows it will be important when applying for loans or credit cards.

Emily is highly comfortable with technology and relies on mobile apps for almost everything, from ordering food to tracking her daily schedule. She expects her banking app to be intuitive and user-friendly, providing her with simple tools to track her expenses, subscriptions, and build credit. She is open to using tools that can help automate parts of her financial management, such as reminders for upcoming payments and automatic bill splitting.

Emily's primary goals are to easily track her subscriptions, build her credit score responsibly, and manage shared expenses with her roommates. She needs the app to simplify her financial life, offering features like automatic bill splitting, tracking recurring payments, and providing tips to improve her credit score. Additionally, she is interested in savings tools that can help her set small goals, such as saving for trips or future purchases.
